* Syntropic lesson

Let us uplift each other!

Our experience is mostly created by our own perception.

While 2020 has challenged our perception with a once in a lifetime reality, we all have the power to create an easier existence for each other.

Each day, Made in Curaçao takes steps to make life more pleasant for at least one producer or customer. We trust that each of our steps will create a path that more people can embark on.

Co-existing

As of October 2020, Made in Curaçao and UBC, United Business Cooperation, are working together, as our goals are the same with just a different business concept. We took the opportunity to work together so we can create a stronger and faster road to success.

Enjoy our October edition.

3D printing or additive manufacturing is a process of making three dimensional solid objects from a digital file.

The creation of a 3D printed object is achieved using additive processes. In an additive process, an object is created by laying down successive layers of material are laid down until we have a finished product. Each of these layers can be seen as a thinly sliced horizontal cross-section of the eventual object. 3D printing is the opposite of subtractive manufacturing, which is cutting out / hollowing out a piece of metal or plastic with, for instance, a milling machine. 3D printing enables you to produce complex shapes using less material than traditional manufacturing methods.

Sustainable Trade Expo

Komersio duradero 2020

Djaweps 19 Novèmber 2020, Made in Curaçao ta organisá su siguiente:
Sustainable Trade Expo / Komersio duradero komo parti di
Global Entrepreneurship Week.

2020 ta e aña pa bai viral ku informashon tokante:

1. Produkto i servisio lokal
2. Energia solar
3. Almasenamentu de energia
4. Outo eléktriko
5. Meta di desaroyo sostenibel
6. Koperativo

CURAÇAO DIGITAL BUILDUP MARATHON

Presented by Curaçao Tech Meetups

The Challenges

It's no secret that our country of Curaçao is facing serious challenges. Neither it's a secret that something should be done. Simply said: The current reality is by now nearly non-negotiable.

How do we take off?

However, how do we start? What shall we do? What is the approach? And so does the list of complicated questions continue, on and on. Simply said, it's the time to actually start doing. Because only massive action creates motion. Quite a no-brainer that drastic changes are necessary.

Our shared responsibility

That's why us at Curaçao Tech Meetups are stepping up by taking our

responsibility and organizing ourselves in a way that is completely future proof. Curaçao Tech Meetups is Curaçao's leading technology conference and platform with 1311 official registrations at our last event in 2019.

This year we continue to push boundaries so therefore we have created the CURAÇAO DIGITAL BUILDUP MARATHON. This is a unique concept to build up mission critical digital infrastructures for Curaçao. Full online and digitally run.

All coordinated by highly skilled facilitators and back up by captains of industries.

Creating strong partnerships

We are bringing this time our large network from Europe, the USA and Latin America into this cutting edge and impactful event. By now we have grown big enough that it's time to build more partnerships. It's nearly impossible to do it all by ourselves. So this is why we are inviting every relevant stakeholder (meaning: YOU!) in the equation: Corporate Curaçao, innovators, free thinkers, creative minds, tech and digital entrepreneurs, young professionals, high school and university students, C-Level executives, friends of Curaçao and of course the Government of Curaçao.

Our focus is to create strong partnerships, to break through invisible walls, with great dedication and discipline to create long term, durable and consistent results. All to make Curaçao an outstanding place to live and do business. We invite you to join us at this amazing event.

Kant'i Awa Race

Kalendijk - In augustus 2020 heeft de tweede Kant'i Awa Race plaatsgevonden sinds een lange tijd. Het is bijna 15 jaar geleden, jaar 2005, dat Gaston Chirino, de initiatiefnemer van deze Bonairiaanse water wedstrijd, een gelijksoortige zeilwedstrijd organiseerde.

De Kant'i Awa Race van 2020 was een geweldig succes met meer dan 90 deelnemers aan de diverse categorie wedstrijden.

De categorieën waren:

BeachCat

Cruisers (jachten)

Kayak, enkel en dubbel

Kitesurf Foil

Microboats

Optimist A+B

Sunfish A+B

Sup Race

Windsurf Foil

Zaterdag 15 augustus 2020 om 09.30 am begonnen de eerste wedstrijden. Als je langs de boulevard reed kon je zelf zien hoeveel boten op het water waren. Je zag de microboten ook op het water. Met heel veel enthousiasme en liefde hebben zij mooie wedstrijden laten zien. Dit was zeker een mooi zicht die we vaker willen zien.

Zondag 16 augustus 2020 was het heel mooi weer op de Bonairiaanse wateren en de zon was ook zeer aanwezig.

De wedstrijden begonnen om 09.00 am, met de Sunfish, Optimisten en Foilers. De Foilers kon je al snel voorbij de Kant'i Awa langs zien gaan.

De hoogte punt was natuurlijk de jachten race, die gewonnen is door Taima 1.

Maar zeer spannend waren de Kayak en Sup wedstrijden. Die respectivelijk gewonnen zijn

door Christian Elderson in de categorie Kayak enkel en Wijnand de Wolf in de categorie Sup.

We hadden ook een handicap race waarbij Sunfish zeilers in optimisten konden gaan varen, Walter Benschop is uitgeroepen tot de beste handicap zeiler van deze Kant'i Awa Races van 2020.

Categorie	Winnaar
BeachCat	1 st Ton Nuijten
Cruisters	1 st Taima 1 2 nd Piano 3 rd Papyro
Kayak	1 st Christiaan Elderson
Kitesurf Foil	1 st Christiaan Zweers 2 nd Pier Zweers 3 rd Maarten Cicllia
Microboot 30	1 st Everardo Janga 2 nd Farid Ayubi
Microboot 35	1 st Everardo Janga 2 nd Farid Ayubi 3 rd Farid Ayubi
Microboat 40	1 st Farid Ayubi 2 nd Everardo Janga 3 rd Sandro Joosten
Optimist A	1 st Gilbert Lai 2 nd Paxienrocque Martis
Optimist B	1 st Yemina Maria 2 nd Noah 3 rd Osdally's Maria
Sunfish A	1 st Sipke 2 nd Yellow Man 3 rd Ton Nuijten
Sunfish B	1 st Kyren Ogenia 2 nd Luca Davidsson 3 rd Aline Brommel
Sup	1 st Wijnand de Wolf
Windsurf Foil	1 st Nigel Hart 2 nd Hendrik 3 rd Gilbert

De Kanti Awa Race van 2020 is een initiatief van Kanti Awa Snack, in nauwe samenwerking met Kas di Regatta. Samen heeft deze hard werkende team in enkele weken alles voor elkaar gekregen. Maar zonder de hulp van de enthousiaste meewerkende partners en de sponsors was het niet gelukt. Graag danken we dan ook iedereen die geholpen heeft om deze watersport wedstrijd tot een werkelijkheid te maken.

Echt een speciale dank aan de Kas di Regatta, Victor Wijnand, Pamela Teitel, Alexander Tromp, Ton Nuijten, Kabes Soliano

SYNTROPIC GARDENING

BASIC COURSE, LESSON 1

Syntropic farm on Curacao, photo by Daniel G. Parris (all other photos courtesy of Wikimedia commons)

Syntropic farming is quickly gaining popularity as a way to grow food at home. Based on the natural growth patterns of plants in their forest habitats, this system is said to provide a healthy growing environment while minimizing the need for irrigation or fertilization.

In this series we will present a basic course on syntropics. Following these lessons will enable anyone to start applying the techniques at home. If you are especially excited and want to skip ahead, feel free to join the Curacao Syntropic Farm group on facebook: <https://www.facebook.com/groups/CuracaoSyntropicFarm>. There you can follow all the lessons from start to finish, ask questions and share tips with other gardeners. You can also find experts there for consultation in more advanced topics.

HAPPY GARDENING!

The basic principles of syntropics:

1. No bare soil
2. High density planting—maximize use of sunlight
3. Natural plant cycles—Succession
4. Different plant layers — Stratification

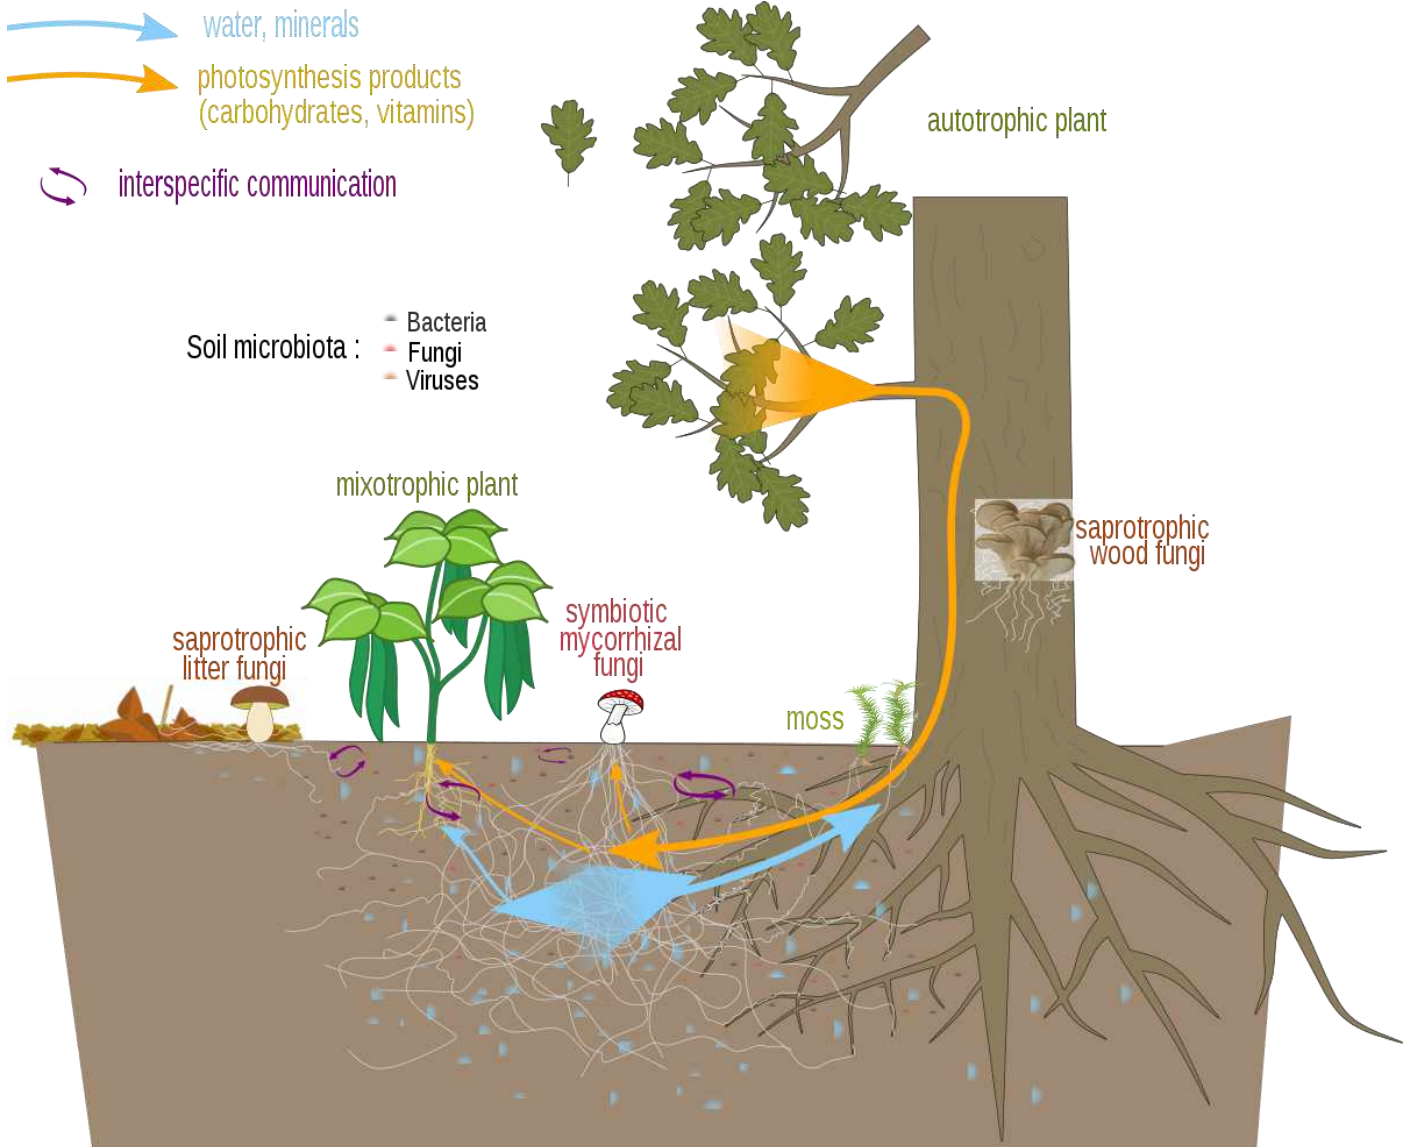

Let's have a look at each one. First, no bare soil! We can analyze how this works in terms of **roots, fungi, bacteria, and water.**

ROOT SYSTEMS

Various plants have different types of **rooting systems**. Some root systems are wide, some shallow, some are dense, some are open. The **spread** of many different roots helps protect the soil as a single system.

FUNGI

Fungi are organisms that look like plants, but live in the soil and do not use light as a source of energy. Instead, they live off decaying plant matter.

We usually only see fungi as molds on our bread or as mushrooms on the ground. However, the fungi are vitally important. They help to break down dead material so the nutrients can return to the soil.

An even more amazing role of fungi is **communicating**. These fungi connect the different plant roots, allowing plants to share nutrients and literally talk to one another. This means plants have a kind of “internet.” Scientists refer to this as the **mycorrhizal network**. (“myco” = fungus, and “rhyza” = root)

BACTERIA

Certain plants such as beans and legumes grow tiny **nodes** on their roots where they provide a home for special bacteria. These microbes are able to extract **nitrogen**, a nutrient, from the air and fix it into the soil. This means they can fertilise plants with just air!

Note: These bacteria are also known as nitrogen-fixing bacteria.

WATER

When we plant trees and forests, we plant **water**. When you remove plants, water from the ground evaporates. The soil becomes exposed to sun and wind and becomes hard, dry, and difficult for plants to grow in.

There is no “bad” plant or “bad” soil if we know what we are doing. We need to work with nature and not against it. Every plant has a place!

Made in Curaçao on LinkedIn

<https://www.linkedin.com/company/made-in-curaçao>

The header of the LinkedIn company page for 'Made in Curacao'. It features a background image of a harbor with two large cruise ships docked at a pier. On the left, there is a circular logo with a green border and the text 'MADE IN CURAÇAO' and 'OPDORING IN SURINA'. Below the logo, the company name 'Made in Curacao' is displayed, followed by 'Marketing & Advertising - Curaçao, St. Maria · 433 followers'. To the right of the company name are two buttons: 'Edit Page' and 'Share Page'. Below the company name, the tagline 'Be unique, original and adventures: Buy Local' is visible.

A screenshot of a LinkedIn post from the 'Made in Curacao' company page. The post is dated '11h' and has a public visibility icon. The text of the post reads: 'Union ta forsa!
Bon siman
#curacao #koperativa #madeincuraçao'. Below the text is a video player showing two women in a conversation. The woman on the left has dark hair and glasses, wearing a white patterned shirt. The woman on the right has short curly hair and is wearing a red top. The video player includes a progress bar at 0:19 / 1:50, a play button, a back button, a volume icon, and a full-screen icon. Below the video player are the interaction buttons: 'Like', 'Comment', 'Share', and 'Send'.

Kondishon ta ku esun ku Bo yuda, ta yuda un otro, Inkondishonal.

Por ta ku kualke kos chikí.

Si Bo no ta keda kla, puntra libramente pa sugerensia.

Ban kumisá ku e Ola: "**Un man ta laba Otro**".

silk painting

My passion for silk painting started 20 years ago. I took a flight to the Seychelles and saw islands like pearls surrounded lined out with white sand, this amazing turquoise and blue ocean shimmering all around...

<https://iammadein.com/global/directory/13686/silkart>

Coming back to Germany I started to put my heart on silk...all my pictures have their own story with symbols and the choice of colors....they are like prayers, guardian angels for dreams for me....manifestations ...some with heavier load coming a long way, some with light messages and some just to transport a smile and good feeling to the ones who feel it.... To paint on silk is like dancing...

the colors do flow and sometimes the interaction of the material makes you change your first intention...you gotta be flexible while painting on silk... On a lot of my

paintings you see the love I feel for this island...finally I am blessed having arrived where my soul longed to be since I was a young girl....

PA NOS 60+ 's

Stichting Karchi 60+ ta partisipá ku nos a kuminsá bek atrobe den e Normal Nobo ku nos servisio pa kuido di pia. Nos tin nos Medische Pedikurista sra. Hertha Smith ku ta sigui duna e kuido di pia pa nos grandinan. Solamente mester yama pa traha un sita.

Tambe sra. Hertha ta bisa; ku den e tempu moderno aki no mester operá uña di pia mas. E ta komuniká ku e tin solushon!

Spesialmente pa nos hendenan ku ta sufri di “ingrow”, uña ku ta krese den karni di e dede pia.

No ta importá ku ta un hende ku tin diabétis of mal sirkulashon, tin tratamentu i tin solushon: traha un sita na Stichting Karchi 60+

Tambe nos ke partisipá ku ta duna e kuido i masashi pa man.

Pa mas informashon yama na Stichting i traha un sita di djaluna pa djabièrnè entre 8or mainta te ku 5or di atardi. **Telefòn 4624433/ 4624432**

Obra di man

Stichting Karchi 60+ ta bai kuminsá ku mas kurso; **Obra di man, kurso di Franses i kurso di Maderin (Chinees)** pero si teniendo kuenta ku e Normal Nobo.

Tur nos otro servisionan tambe a sigui pero ku e Normal Nobo.

Tur edat por tuma kontakto ku Karchi 60+ pa informashon kon partisipá, e-mail: info@karchi60plus.com

Kooperativa UBC

ta partisipa su speshalnan:
